

# Toddler-Caregiver Language Group

Led by two of our speech language pathologists, Toddler-Caregiver Language Group is a new addition to Outpatient Pediatric programming that focuses on coaching caregivers on evidenced-based language facilitation strategies, responding and waiting, making comments, and showing it.

Caregivers will gain experience using language facilitation strategies outside of the traditional therapeutic setting to increase carryover to home, including a park and sensory playroom.

Caregivers will also have the opportunity to meet other caregivers.

Toddlers will practice communicating their wants, needs, and ideas with new play partners across a variety of setting.

August 2 and 16, September 6 and 20  
9–10:30 am

Ages 4 & under with a consistent caregiver to attend all sessions

All sessions will be held at:

Shirley Ryan AbilityLab  
355 East Erie  
Chicago, IL 60611
